Why Our HRMS Software

An affordable HRMS software for small businesses

Why our HR Management Software?

We are a Microsoft Access based Human Resource Management (HRMS) software solution provider. If you are a small business, and you need to setup a database for your human resource management but don't have a big budget to build it up, this software is perfect for you. We understand that small businesses have unique requirements for human resource management software that demand full capabilities without complexity and want to see quick return with investment. We work closely to human resource professionals and small businesses, so we understand what you think. Our HRMS software provides a new affordable way to fit your HR management needs. This software is Microsoft Access based HR management software. With a very low budget, you can skip hiring an HR person and can start all your human resource management work now, on your own computer with MS Office.

- Microsoft Access is the most widely used desktop database system in the world.
- Our human resource management software pretty much covers all the human resource management functionalities for small to medium business needs.
- You can access this HRMS software, update HR data, view/modify the HR reports from anywhere through your tablet or smartphone device.
- This human resource management software is significantly less expensive than SQL Server or Oracle based human resource management solutions

What type of company is suited to use this HR Management Software Solution?

For small businesses, this is the fastest and least expensive database solution to get your goals accomplished. Our human resource management software only costs 10% of other human resource management software in the market, but we can really help you solve your problem. Our already built Microsoft Access database template applications make running your business easy and fast. With our human resource management software's help, you can build your own HR database; manage your employees, and create your HR reports with more efficiency.

Here is what this HR software can help:

We offer a ONE SOURCE HR management software, enter data ONLY ONES into human resource database instead of a combination of spreadsheets and other paper files. It will reduces errors and increase work efficiency.

-Employee Information Management

- Salary history and benefits
- Attendance, vacation and sick leave tracking
- Performance Reviews
- Training data tracking

-HR Management

- HR management reporting
- Reminding and keep tracking of Human Resource tasks
