

Human Resource Management Software

Our Microsoft® Access® based human resource management system (HRMS) software are designed for small and medium sized business. This powerful and easy to use HRMS software allows your HR team start working more efficiently on utilizing their time and resource. It offers you wide range solutions for your human resource data management needs.

These HRMS software features include employee data management, applicant data management, job data management, employee training data management and more...

As we all know, Microsoft Access is the most widely used desktop database system in the world. Microsoft Access is part of Microsoft Office so there is a common interface and lots of developers and support options available. It pretty much covers all the functionalities for small business needs. And it is less significant expensive than SQL Server or Oracle. For small businesses, this is the fastest and least expensive database solution to get your goals accomplished.

Our human resource management software is open source including all MS Access source code and can be fully customizable by using Access 2007 or 2010. Compare with other human resource management software, our HRMS software is very flexible with full human resource management functions and easy to use, with a very small cost we give you the full Access database and source code. If you know how to use Access, you

know how to use this HRMS software and potentially expand the functionalities to fit your future business needs as your business grows.
